PROFILE

To secure a position as a Software Engineer in a renowned organization where I can efficiently contribute my skills and abilities for personal accomplishment and for the utmost success of the organization.

WORK EXPERIENCE

TPS Worldwide, Senior Software Engineer 1

04/2026 – Present | Karachi

Bill Payments Team

- IRIS Bill Payment Platform:** Support and enhance a multi-channel bill payment platform, working on online and offline biller integrations, dynamic addition of new billers, and configurable processing rules.
- Billing Gateway & Grace Period Configuration:** Configure the platform as a billing gateway, including grace period rules and other biller-specific settings.
- Disputes & Reversals:** Support fast and effective resolution of payment disputes through payment reversal processing.
- Cutover Activities:** Participate in cutover planning and execution to ensure smooth, low-risk transitions during go-lives and releases.
- Production Support:** Investigate and resolve client production issues, coordinating with stakeholders to minimize downtime and impact.
- On-Premise Implementation Support:** Provide on-site support during cutover and implementation phases for client deployments.

Transviti Pvt Ltd, Software Engineer

04/2025 – 04/2026 | Karachi

CRM Revamp & Workflow Automation

- Revamped existing CRM by enhancing core HR modules, including employee data, attendance, leave, and timesheets.
- Designed and developed a fully dynamic Appraisal Module, enabling configurable employee selection, custom fields, date ranges, and automated data processing.
- Automated the Offboarding Process with a dynamic stage-based workflow with admin assignment, email/in-system notifications, and PDF summaries for leadership.
- Implemented Leave Automation via configurable escalation workflows.

E-commerce System

- Developed core components including product management, user authentication, order handling, and payment workflow support.

Audit Management System

- Implemented modules for audit scheduling, compliance tracking, reporting dashboards, and role-based access control.

Order & Delivery Management System

- Created features for order creation, delivery assignment, real-time tracking, and automated status notifications.

GuruGroup LLC, Software Engineer

07/2023 – 07/2025

Full Stack Developer

- Front-End Development:** Responsive and cross-browser UI development; Design implementation using CSS and styling frameworks; Integration of third-party libraries and APIs.
- Back-End Development:** Server-side logic implementation and API development; Authentication and authorization mechanisms.
- Deployment and management of server environments and cloud platforms like Azure or Google Cloud.
